AYURVEDA

INTRODUCTION

problem statement:	Ayurvedic Formulation Recommendation Software
Team size:	3 people
Team Members:	Vyshnavi, Jahnavi & Chetan Rohan
Resources used:	Figma, Android Studio & canva

Abstract of the problem

Our team delved deep into the ancient texts of Ayurveda to understand the principles and concepts that form the foundation of this holistic healing system. With this knowledge, we set out to create a software program that could accurately recommend Ayurvedic formulations based on a patient's specific needs and conditions.

Through extensive research on ayurvedic formulations and Ayurvedic practitioners, we were able to develop an intuitive system that takes into account a range of factors, including symptoms, patient history, and potential contraindications. Our software utilizes a sophisticated algorithm to analyze this information and recommend the most appropriate formulations based on the patient's unique needs.

Overall, we are proud to have created a tool that can help Ayurvedic practitioners provide their patients with personalized care and treatment, while also preserving the traditions and wisdom of this ancient healing practice.

Exploring Solutions for Public Health: Rediscovering Ayurveda

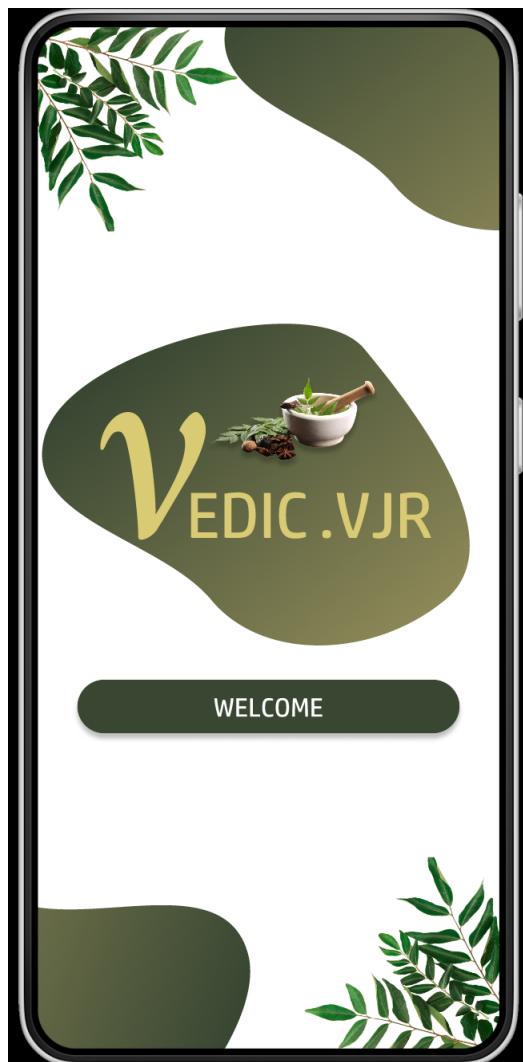

Our team began by exploring various problem statements in search of a way to benefit the public, and found that health was a top priority. With modernization came a preference for easy and modern techniques to cure diseases, leaving the ancient practices of Ayurveda behind. Therefore, we decided to support and promote Ayurveda practitioners and their research to bring back the golden era of this traditional practice.

Social impact :

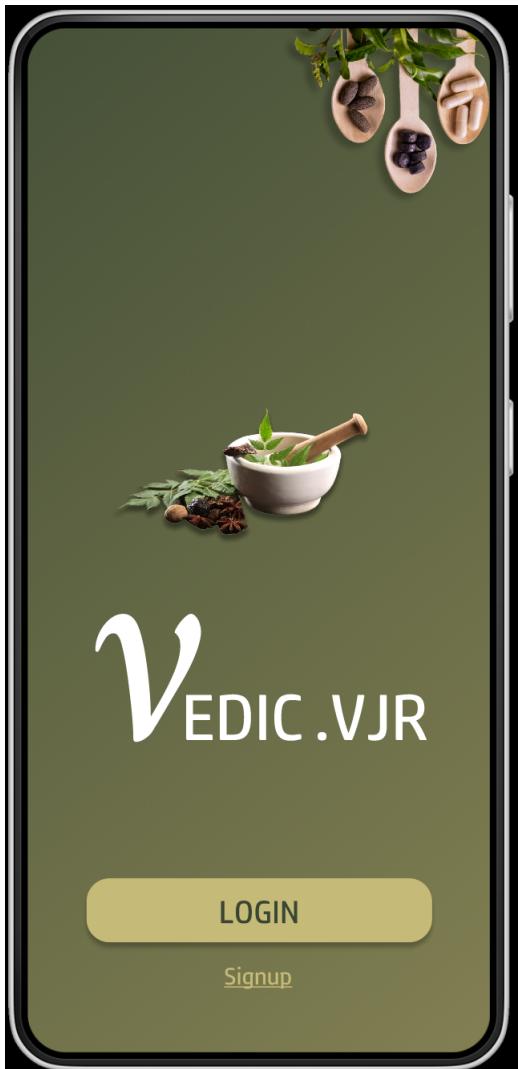

As previously discussed, modernization has stripped us of many efficient practices, including Ayurveda. Even Ayurvedic practitioners have struggled to keep up with the times. This app is designed to assist both practitioners and students in identifying the appropriate product formulation by searching for their symptoms or exact cause. By doing so, we hope to reveal the hidden treasures of Ayurveda.

Outline of the application

1 - welcome page

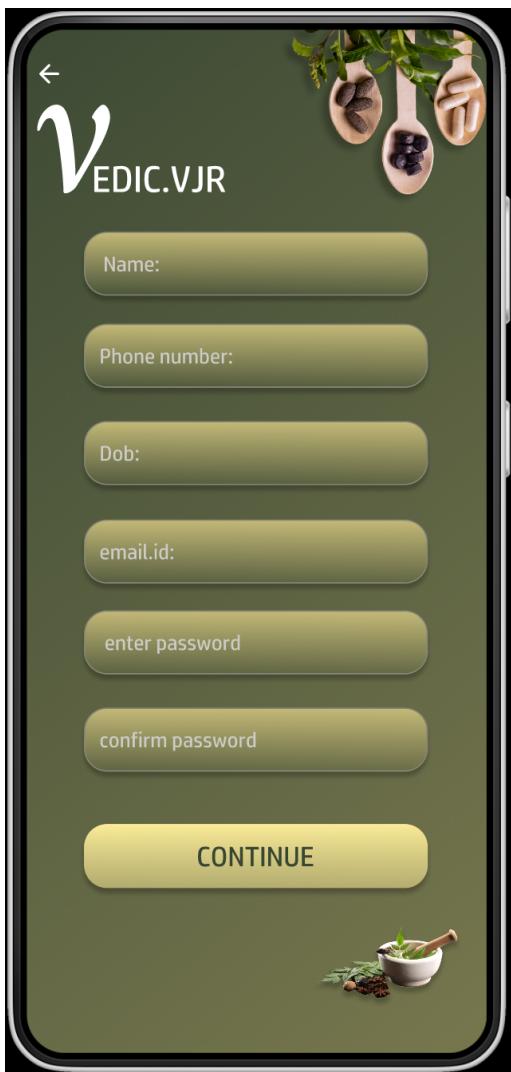

2 - login/sign-up page

3 - login page

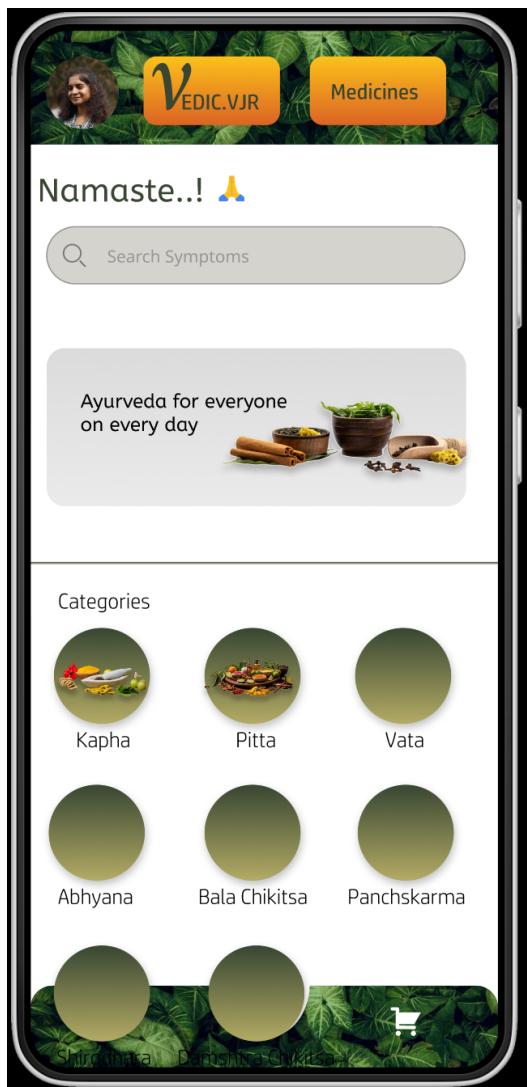

4 – sign-up page

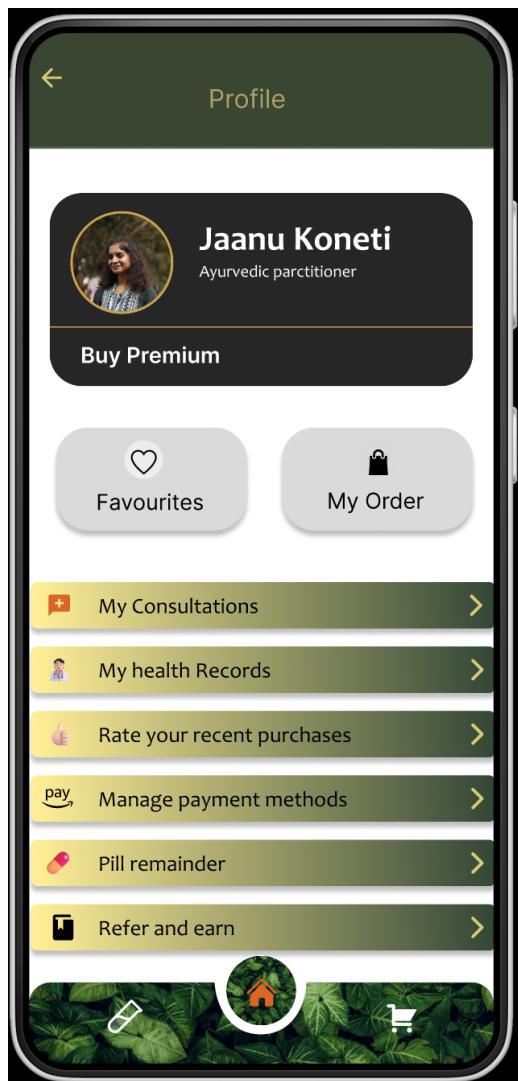

5 – ayurvedic practitioner/student selection page

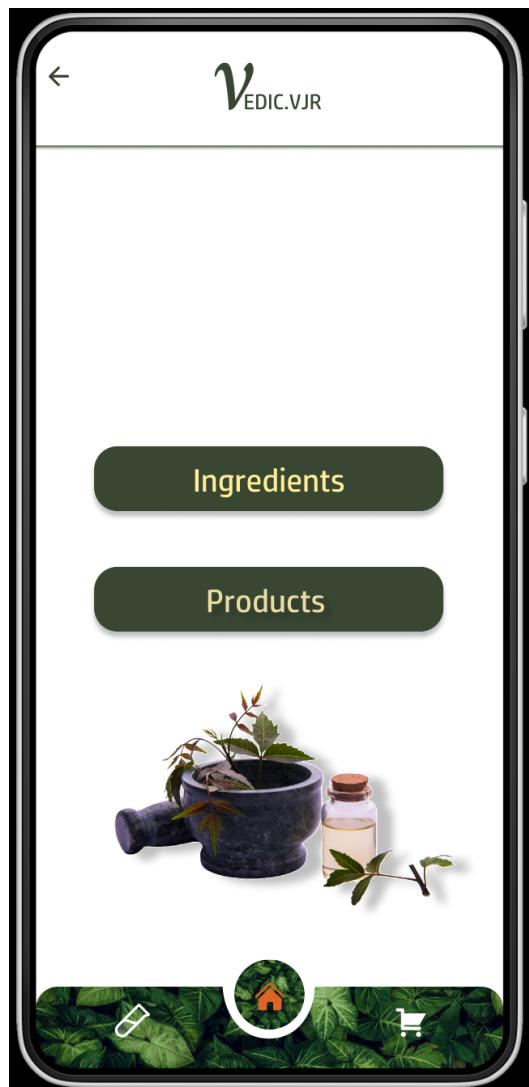

6 – Home page

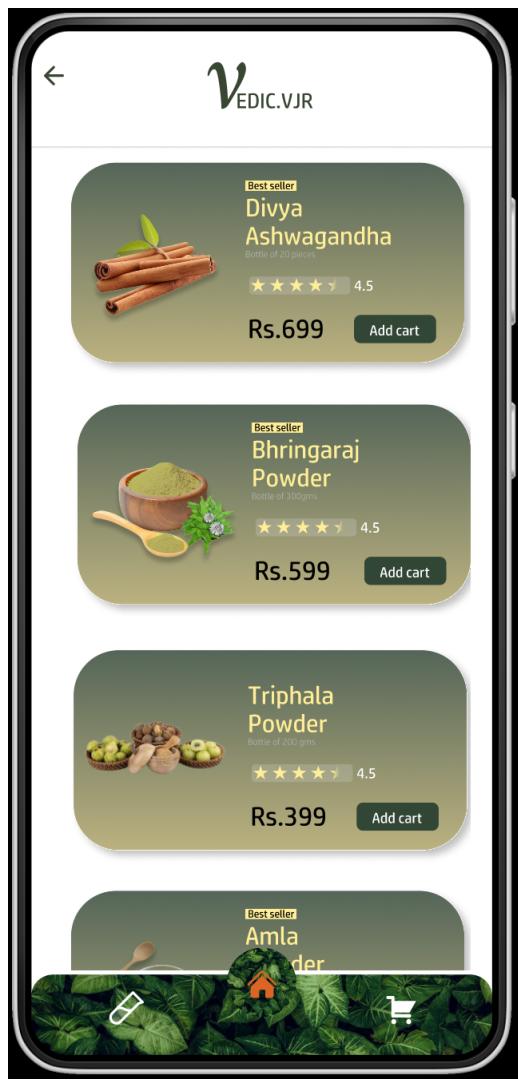

7 – Profile page

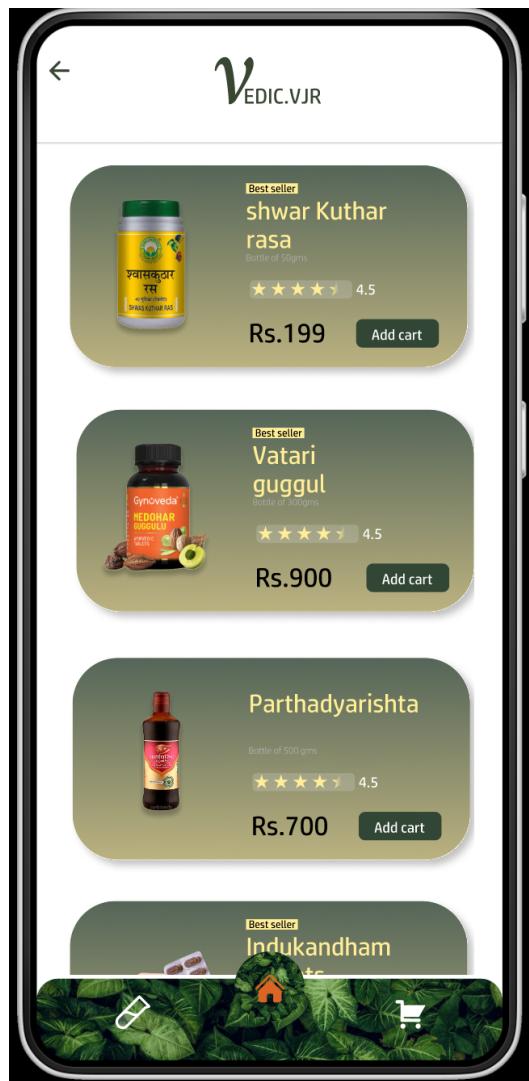

8 – Medicines page

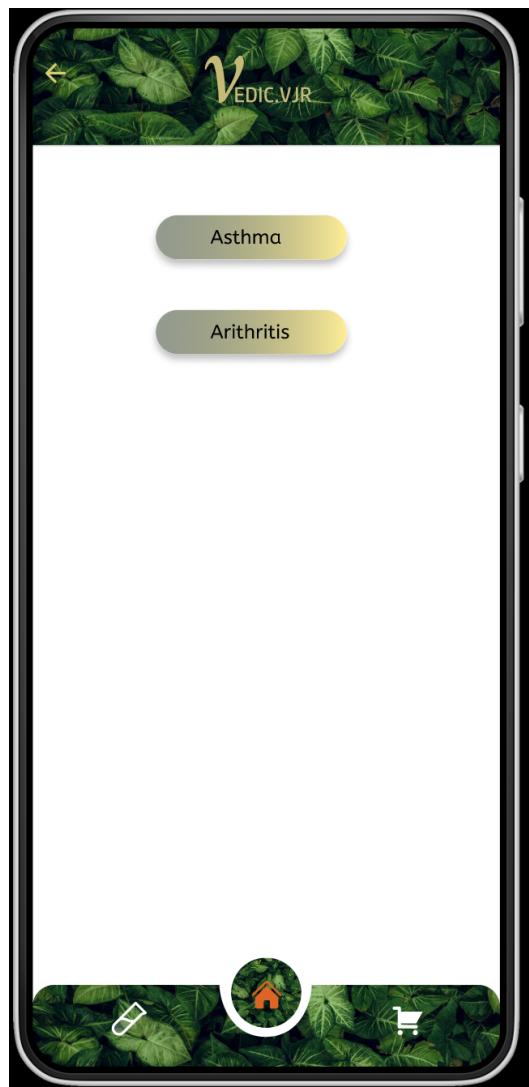

9 – ingredients page

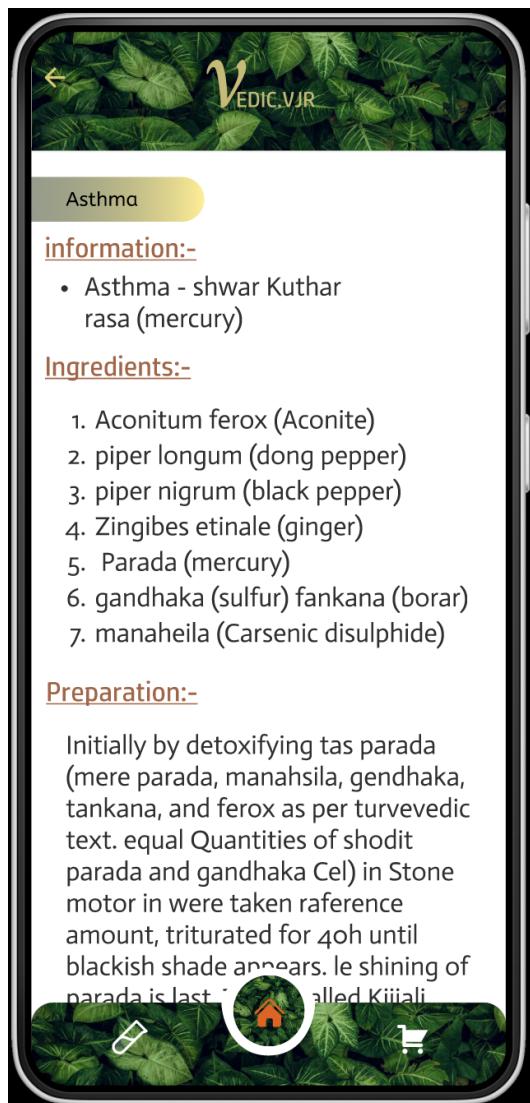

10 – Products page

11 – Formulation page
